Importance: High

[CLR Members,](#)

Please read the important message below.

We have attached a notification from the Province of BC regarding priority vaccines for construction employees and workers in the Lower Mainland/Fraser Valley.

If you have employees working in these health regions, they are now considered part of a priority target group for receiving vaccination. Please pass this information on to all affected employees.

The notice from the government health authorities, coordinated by BC Construction Safety Alliance (BCCSA):

Construction Industry Leaders,

Please see the attached letters, and associated documentation from Vancouver Coastal Health Authority and Fraser Health Authority regarding prioritizing construction workers for Covid-19 vaccinations.

In an effort to get as many in the construction sector vaccinated, please distribute to as many contacts as possible.

Take care,

*Michael McKenna, B.Sc.(O.T.)
Executive Director*

We appreciate your cooperation!

Stay safe.
