Free WorkSafeBC Asbestos Training and Certification Worker Forums

(Source: WorkSafeBC)

You are invited to attend our asbestos training and certification worker forums

Do you work with asbestos in B.C.? You are invited to attend a webinar to learn about mandatory requirements that we are implementing to help keep workers safe from the dangers of asbestos.

What you'll learn

As of January 1, 2024, anyone performing asbestos abatement work must complete mandatory safety training and obtain certificates.

Tim Loblaw, Certification Services manager at WorkSafeBC, will help you understand this requirement by providing an overview of:

- Asbestos abatement certification basics
- Finding an approved training provider
- Assessments and exams
- Recognition of previous training
- Accessibility and accommodations

You'll also have an opportunity to ask questions during a live Q&A.

How to register

Virtual sessions are planned for the following dates (all times listed are Pacific time zone):

- Wednesday, Sept 13, 2023, 4:30 p.m. – 5:15 p.m.
- Thursday, Oct 5, 2023, 4:30 p.m. – 5:15 p.m.

[Register for a session now](#)

After you register

We will send registered attendees an email reminder and login instructions in advance of your selected session. Please add experience@worksafebc.com to your address book to ensure you receive updates. For more information about the requirements, please visit the [Asbestos training, certification & licensing](#) section of our website.

If you have any questions about the WorkSafeBC virtual forums, please contact Glen Williams CLR.
